WORKSHOP ON

RAPE

CULTURE

Sexual violence is everywhere: it's on TV, it's in our language, it's in our fantasies. In fact, it is so omnipresent that we sometimes fail to see it at all. Rape culture is a term used to describe the ways in which sexual violence has become so normalized in our society. This workshop will explore how rape culture has been used as a tool of power and repression by discussing who it targets, who it benefits, and how it is entrenched in gender roles. We will discuss ways in which we can challenge and delearn a culture of rape and work towards communities free of sexual violence.
